Do you know? Umami /uːmɑːmi/ is a loanword from the Japanese: 旨味 *(Essence of deliciousness, borrowed from Chinese Cantonese)*. It is one of the five basic tastes. It has been described as savory and is characteristic of broths and cooked meats. It can be translated as "pleasant savory taste". There is no current English equivalent of umami, however, some close descriptions are "meaty", "savory", and "broth-like". Technically, umami is the taste of glutamate, an amino acid that is one of the building blocks of protein. Glutamate occurs naturally in the human body and in many delicious foods we eat every day.

Foods that have a strong umami flavor include meats, shellfish, fish, tomatoes, onions, broccolies, mushrooms, hydrolyzed vegetable protein, meat extract, yeast extract, cheeses, and soy sauce etc.
